International Trade

Labor Economics

## Employment

University of Colorado, Boulder 2014-Present

Teaching Assistant: Principles of Microeconomics, Intermediate Microeconomics

Instructor: Principles of Microeconomics

NBER, 2016-Present

Research Assistant, Grant: Trading, Institutions, Product Innovation, and Entrepreneurship

## Working Papers

Supply Chains, International Trade, and Wages

*This paper highlights the importance of supply chains in exposing workers in non-import competing sectors to trade shocks in other sectors. Firms trade in intermediates to establish a supply chain, and workers are complements to these intermediates. When there is a trade shock in an import competing sector, workers in any sector whose employer trades with the import competing sector face changes in their nominal wages.*

## Awards

Leslie Whittington Memorial Fellowship for Excellence in Economics

Yordon Prize in Microeconomics
